2. This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity, without numbers. A tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an individual's tribal affiliation. A tribal census tract is not a county, state, or off-reservation trust lands cross state or county boundaries; the same tribal census tract number may be assigned on both sides of the boundary, even if, in fact, the jurisdiction is different.
3. A - following a block number indicates that the block number is repeated elsewhere in the block.
